Portfolio: <https://ahmedolek2004.github.io>

PROFESSIONAL SUMMARY

Information Technology student and software developer focused on building modern, responsive web applications and practical software solutions. Experienced with frontend development using React, JavaScript, HTML, CSS, Tailwind CSS, and Vue.js, with additional experience in backend development, databases, and IoT-based systems. Interested in clean architecture, reusable components, responsive interfaces, API integration, and practical problem solving while continuing to develop full-stack software engineering skills.

EDUCATION

Borg El Arab Technological University — B.Sc. in Information Technology

Alexandria, Egypt | Sep 2024 – Present

- GPA: 4.0 [VERIFY BEFORE FINAL SUBMISSION]
- Relevant areas: Programming, Web Development, Databases, Operating Systems, Networking, Cybersecurity, Data Structures, Software Development

TECHNICAL SKILLS

Programming: C, C++, Python, Java, JavaScript, PHP, Dart

Frontend: HTML5, CSS3, JavaScript, React.js, Vue.js, Angular.js, Tailwind CSS, Bootstrap, Vite, shadcn/ui

Backend & Web: Node.js, Laravel, REST APIs

Databases & Cloud: Firebase Realtime Database, SQL / Relational Databases

Tools: Git, GitHub, VS Code, Vite

IoT / Embedded: ESP32, Arduino, Embedded C/C++

EXPERIENCE

Frontend Developer — Kenan | [2024/12/1]

- Developed responsive web interfaces using [react.js].
- Implemented reusable UI components and frontend functionality.
- Debugged and improved frontend applications.
- Collaborated on feature implementation and web development tasks.

Important: Confirm the official company name, job title, dates, and responsibilities before submitting.

FEATURED PROJECT

Smart Home Energy Management Control System (SHEMCS) — Graduation Project | 2025–2026

ESP32 • C++/Arduino • Firebase Realtime Database • Vue.js • Vite • IoT

Designed and developed as part of a multidisciplinary graduation project focused on real-time residential energy monitoring, control, and electrical safety.

- Developed ESP32 firmware for sensor acquisition, data processing, Wi-Fi communication, and relay control.
- Integrated ACS712 current sensing and ZMPT101B voltage sensing for electrical measurements.
- Implemented high-frequency sampling, noise filtering, and RMS calculations.
- Integrated Firebase Realtime Database for real-time telemetry and bidirectional command synchronization.
- Contributed to a responsive Vue.js dashboard for voltage, current, power, energy, relay status, and protection settings.
- Worked with an 8-channel relay module for independent load control and automatic load isolation during detected hazards.
- Contributed to system testing, documentation, and final presentation materials.

OTHER PROJECTS

College Student Helper Platform | React • TypeScript • Node.js • Supabase • Tailwind CSS

Student-focused platform for organizing academic years, semesters, subjects, resources, previous exams, assignments, announcements, and learning materials.

Caesar Cipher Desktop Application | Python • Tkinter

Desktop GUI application supporting encryption, decryption, user-defined keys, file selection, and input validation.

Smart Parking System | IoT • Embedded Systems • Web

IoT-oriented parking solution developed as part of academic/project work. [VERIFY EXACT TECHNOLOGIES AND FEATURES].

E-Commerce Product Catalog | Web Development

Responsive product catalog interface for presenting and organizing product information. [VERIFY TECHNOLOGIES].

Movie / Book Library Application | Web Development

Web application for browsing and organizing movie/book content through a structured user interface. [VERIFY TECHNOLOGIES].

VOLUNTEERING

WE — Student Volunteer | Alexandria, Egypt | Oct 2024 – Jan 2025

CERTIFICATIONS

- Frontend Development — Borg El Arab Technological University | Nov 2024 [VERIFY CERTIFICATE / CREDENTIAL URL]
- Backend Development — Borg El Arab Technological University | Dec 2024 [VERIFY CERTIFICATE / CREDENTIAL URL]
- Mobile Application Development — Borg El Arab Technological University | Dec 2025 [VERIFY CERTIFICATE / CREDENTIAL URL]
- Final Project — Borg El Arab Technological University | Oct 2024 [VERIFY CERTIFICATE / CREDENTIAL URL]

LANGUAGES

Arabic — Native | English — Proficient

LINKS / FINAL CHECKS

- Replace [ADD URL] with real GitHub and LinkedIn URLs.
- Verify GPA, Kenan employment details, dates, technologies, and certificate records.
- Add real project GitHub/live-demo links where available.
- Keep the final CV to 1 page if applying for internships/junior roles; use 2 pages only when verified experience warrants it.
- Remove all [VERIFY] / [ADD] notes before submitting.
